Jacques –

It's Bear electrical doing the work in the right-of-way, correct? I have no problem issuing them a no-fee license, but please have them fill out the attached. Please let me know how I might else help assist this project along. My community is quite anxious to get these ALPRs up and running as soon as possible.

Thanks,

Kevin

Subject: Re: Duarte/Bradbury ALPR Camera pre-install requirements

Hello Jacques,

Yes, a "no-fee" permit will be issued to the contractor performing the work within the City right-of-way. The contractor will be required to provide a copy of their contractor's license (a Class A license is required to work within the City r/w), their insurance certificates, and City business license.

We will need plans indicating the location of work, length of trench, and area of impact to the City r/w. Electrical plans are typically prepared as line drawings similar in nature to those plans prepared by Edison. If you do not have plans prepared to this technical level, you can provide a pdf image of an aerial map along with location of all work. Please keep in mind that all trenches excavated within the City r/w are required to be prepared per Greenbook standards, and the plans should have a note to that effect. Once I receive the plans, I can work up the permit application for you.

Please make all submittals as "hard copies" through City Hall, unless the City Manager authorizes electronic submittals.

Thank you.

Hi Kevin,

I'm following up on the email you sent on 10/22 to Jason from Bear Electric (e-mail chain is below).

Can you please outline for us what permits and documentation we need in order to schedule the camera installation?

1. Permits: Will Bear Electric just need a no cost encroachment permit? Can you specify any info needed in order to have the permit issued?

2. Conduit/trenching outline: You requested a plan outlining the power/conduit trenching. Does the plan need to be in a specific format or is a simple document with redlined pictures sufficient?

3. Any other documents/permits required?

Thank you,

Jacques

Jason,

John Leveillee – Bradbury Deputy City Engineer – is looking a plan outlining the conduit trenching. John is CCed in this email.

Subject: Re: City of Bradbury - ALPR Camera

Kevin,

I've copied in Jason from Bear Electric so you can supply him with any paperwork required to obtain the permits from Bradbury.

Jason,

Bradbury will be issuing permits for the two ALPR pedestals and needs the locations of the conduit trenching (see email below).

The LPR equipment has been shipped and they should be receiving SIM cards within two weeks, so we are almost ready to start installation.

Thank you,

Jacques

Hello,

Bradbury will be issuing permits for the work completed. Can you please send to us the locations of the conduit trenching? Because it's in the public right-of-way, we will also be doing inspections.

Thanks,

Kevin

Hi Kevin and Larry,

Kevin will Bear Electric need permits for the ALPR install?

Larry please work with Jacques and order the SIM cards.

Greg is in the process of getting the paperwork signed to contract Bear Electric to do the installation.

Once he has it signed I can schedule a date for installation with them. It depends on availability but it should be somewhere within 2-4 weeks.

The only other items we'll need from the city prior to install are:

1. The two cellular SIM cards from Verizon. They'll need to be unrestricted static IP addresses, size 2FF SIM cards.

2. Any permits required by the city for Bear to do the install.

Subject: RE: City of Bradbury - ALPR Camera

Understood! I will get this processed.

It looks like your order shipped today. I am pulling in Jacques Lilavois, who will be coordinating the installation of the equipment. Jacques, this is for the covert cubes for Duarte and Bradbury. Can you please work with Briand and Bear to coordinate the installation?

Thank you!
